2627

DATE MAILED: 10/05/2006

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary

Application No.

10/811,682

Applicant(s)

CHAN ET AL.

Examiner

William J. Klimowicz

Art Unit

2627

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-20 is/are pending in the application.
- 4a) Of the above claim(s) ____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) ____ is/are allowed.
- 6) ☐ Claim(s) ____ is/are rejected.
- 7) ☐ Claim(s) ____ is/are objected to.
- 8) ☒ Claim(s) 1-20 are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on ____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
 - ☐ Certified copies of the priority documents have been received in Application No. ____.
 - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 2-9, 11, drawn to the details of a diffuser used in a disk drive, classified in class 360, subclass 97.02.
- II. Claim 10, drawn to drawn to the details of a contraction device used in a disk drive, classified in class 360, subclass 97.02.

The inventions are distinct, each from the other because of the following reasons:

Inventions I are II related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct if they do not overlap in scope and are not obvious variants, and if it is shown that at least one subcombination is separately usable. In the instant case, subcombination I has separate utility such as a diffuser and its associated details used in a conventional disk drive, sans a contraction apparatus. Additionally, the contraction apparatus can be used in a conventional disk drive bypass channel, sans the diffuser. See MPEP § 806.05(d).

It is noted that claims 1 and 12-20 are linking claims, and as such, will be examined with the elected invention.

The examiner has required restriction between subcombinations usable together. Where applicant elects a subcombination and claims thereto are subsequently found allowable, any claim(s) depending from or otherwise requiring all the limitations of the allowable subcombination will be examined for patentability in accordance with 37 CFR 1.104. See MPEP § 821.04(a). Applicant is advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the

Art Unit: 2627

present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application.

Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the inventions require a different field of search (see MPEP § 808.02), and because the inventions have acquired a separate status in the art due to their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Because these inventions are **independent or distinct** for the reasons given above and have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is **PROPER**.

More specifically, as set forth in **MPEP § 803**:

Under the statute an application may properly be required to be restricted to one of two or more claimed inventions only if they are able to support separate patents and they are either independent (**MPEP § 806.04 - § 806.04(i)**) *or* distinct (**MPEP § 806.05 - § 806.05(i)**). [Emphasis in bold italics added].

Moreover as set forth in **MPEP § 802.01**, the meaning of independent “and” distinct within the context of Patent Office restriction policy and practice is articulated as follows:

35 U.S.C. 121 quoted in the preceding section states that the Commissioner may require restriction if two or more “independent and distinct” inventions are claimed in one application. In **37 CFR 1.141**, the statement is made that two or more “independent and distinct inventions” may not be claimed in one application.

Art Unit: 2627

This raises the question of the subjects as between which the Commissioner may require restriction. This, in turn, depends on the construction of the expression "independent and distinct" inventions.

"Independent," of course, means not dependent. If "distinct" means the same thing, then its use in the statute and in the rule is redundant. If "distinct" means something different, then the question arises as to what the difference in meaning between these two words may be. The hearings before the committees of Congress considering the codification of the patent laws indicate that **35 U.S.C. 121**: "enacts as law existing practice with respect to division, at the same time introducing a number of changes."

The report on the hearings does not mention as a change that is introduced, the subjects between which the Commissioner may properly require division.

The term "independent" as already pointed out, means not dependent. A large number of subjects between which, prior to the **1952 Act**, division had been proper, are dependent subjects, such as, for example, combination and a subcombination thereof; as process and apparatus used in the practice of the process; as composition and the process in which the composition is used; as process and the product made by such process, etc. If section **121** of the **1952 Act** were intended to direct the Commissioner never to approve division between dependent inventions, the word "independent" would clearly have been used alone. If the Commissioner has authority or discretion to restrict independent inventions only, then restriction would be improper as between dependent inventions, e.g., the examples used for purpose of illustration above. Such was clearly not the intent of Congress. Nothing in the language of the statute and nothing in the hearings of the committees indicate any intent to change the substantive law on this subject. On the contrary, joinder of the term "distinct" with the term "independent," indicates lack of such intent. The law has long been established that dependent inventions (frequently termed related inventions) such as used for illustration above may be properly divided if they are, in fact, "distinct" inventions, even though dependent.

Thus, clearly, the restriction is proper if the Examiner shows that the inventions are distinct **or** independent, but not necessarily both independent *and* distinct.

The Examiner *additionally* maintains that each identified Invention Grouping, as articulated in the Requirement for Restriction, *supra*, would impose other grave, *serious burdens*

Art Unit: 2627

upon the Examiner. Moreover, in accordance with **37 CFR 1.104**, to the nature of each distinctly grouped Invention, the Examiner must make a thorough study thereof and a thorough investigation of the available prior art relating to the claimed subject matter of each distinctly identified Grouping. The examination for each distinct Grouping must be complete with respect both to compliance of the application with the applicable statutes and rules and to the patentability of the invention as claimed, in addition to matters of form, including **Title 35** to the **United States Code**, sections **101**, **102**, **103** and **112**, to each distinctly grouped invention.

Moreover, each separately grouped Invention must be thoroughly searched, including, but not limited to, various searching fields, inclusive of differing text search strategies and/or queries, determination of anticipation, if any, of uncovered prior art, potential application of the Graham factual inquiries to each distinct Invention to review for any indicia of possible obviousness, etc.

Moreover still, as has been held, if there is an express admission that the claimed inventions would have been obvious over each other within the meaning of **35 U.S.C. § 103**, restriction should not be required. *In re Lee*, 199 USPQ 108 (Comm'r Pat. 1978).

There is nothing on record, at present, to show that the distinctly grouped Inventions are obvious variants.

If the Applicant traverses the election/restriction requirement, the Examiner will judiciously assay the traversal to determine whether the Applicant has admitted, either implicitly or explicitly, that the restricted Inventions bear no patentable distinctness between each Grouping, and/or sub-grouping(s), as set forth, *supra*.

Art Unit: 2627

Should Applicant traverse on the ground that the Inventions are not patentably distinct, Applicant should submit evidence or identify such evidence now of record showing the Inventions to be obvious variants or clearly admit on the record that this is the case. In either instance, if the Examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under **35 U.S.C.103(a)** of the other invention.

Joint Inventor(s), if Any

If there is more than one inventor, the following should be noted: Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with **37 CFR 1.48(b)** if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under **37 CFR 1.48(b)** and by the fee required under **37 CFR 1.17(i)**.

Conclusion

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE **ONE (1) MONTH OR THIRTY (30) DAYS**, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION. Extensions of time may be available under the provisions of **37 CFR 1.136(a)**. In no event, however, may a reply be timely filed after **SIX (6) MONTHS** from the mailing date of this communication. Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (**35 U.S.C. § 133**). Any reply received later than three months after the mailing date of this

Art Unit: 2627

communication, even if timely filed, may reduce any earned patent term adjustment. See **37 CFR 1.704(b)**.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to William J. Klimowicz whose telephone number is (571) 272-7577. The examiner can normally be reached on Monday-Thursday (6:30AM-5:00PM).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Hoa Thi Nguyen can be reached on (571) 272-7579. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
